Editor:

Now that the election has been called I am wondering if the following situation could be addressed - more help for largely forgotten members of society, the low income senior.

I'd suggest the following be looked at:

- rent reduced in apartments for low income seniors, 25 per cent (including utilities, except telephone);
- a 'break' on medical and dental, including glasses and prescription drugs;
- a 'break' for low-income seniors in their own homes, lower taxes and utilities.
